SUMMARY

An innovative Flutter developer with 1 year of experience building high-performance apps for Android and iOS platforms. I specialize in creating engaging user interfaces using the latest Flutter tools, and I have experience with Firebase integration, strong backend integration via RESTful APIs, and state management solutions (Bloc and Getx). I am passionate about writing clean code and following development best practices.

EDUCATION

Bachelor of Information Engineering

Al-Sham Private University – Syria

2020 2025

RELEVANT SKILLS

- **State Management:** Experienced with Bloc , Getx, for efficient state handling.
- **API Integration:** Skilled in working with RESTful APIs, JSON parsing, and using Dio/http packages.
- **Firebase:** Integrated Firebase Authentication, Firestore
- **Local Storage:** Knowledge of local data handling using SQLite, and Shared Preferences.
- **UI/UX Design:** Expertise in building responsive, clean, and custom user interfaces using Material & Cupertino widgets.
- **Tools:** Android Studio, VS Code, Git, GitHub .

PROJECTS

Forsa Tech - Job Opportunities App

A mobile app that helps developers find job opportunities via filtering and search features. Developed using Flutter, Firebase, and State Management Bloc. It includes the following features:

- job listing with a comprehensive profile for each job title, notifications when suitable job opportunities become available, flexible filtering options to facilitate job searches, and elegantly designed interfaces to provide easy and seamless user experience.

SalamHack - Smart CV Generator (Hackathon Project)

A mobile app developed during the SalamHack 2025 Hackathon, using Flutter and State Management Bloc.

- The app allows users to create professional CVs compatible with an Applicant Tracking System (ATS) by entering their professional and personal data. It also allows users to edit their CVs, providing tools to evaluate them, and suggesting improvements using artificial intelligence
- The app also focuses on improving job seekers' opportunities by providing a tool to convert traditional CVs into an ATS-compatible format, making it easier to read and match their data with hiring systems.

Viawise - Online travel agency for booking management

A mobile app that helps individuals plan and organize travel trips by connecting users with a travel agency. The system provides flight tickets from various airlines and then displays them to users through easy-to-use interactive interfaces. The system also offers several services, including:

- Electronic booking and flight details management, from booking to seat selection to tracking booking status.
- A return and refund policy is available in the event of a flight cancellation.

ACHIEVEMENTS

Winner of 8th place in the Arab world at SalamHack 2025 Hackathon as a member of the Code i5 team, for developing the Smart CV Generator application using Flutter & Django and artificial intelligence and **received a certificate of achievement from the SalamHack organizers for innovation and project impact**
